### Content (Syllabus outline):

The course is focused on myths and popular culture with a particular interest in the case of Slovenia. In such a manner it deals with popular culture in Slovenia – the contexts, currents, specifics as they show in film, television, music, youth movements, advertising, design etc. In this relation it is devoted to the construction and representation of (everyday) myths, in particular those related to the consolidation to national identity.

The course is as well devoted to the question of popular culture as a locus for resistance or critique of dominant myths.

The course assures theoretical origins for the comprehension of popular culture. In this regard it is focused on three main aspects of

popularno kulturo: 1. kaj oziroma kdo določa popularno kulturo. 2. vpliv komercializacije in industrializacije na popularno kulturo. 3. ideološka vloga popularne kulture.

Predmet obravnava odnos med reprezentiranjem v popularni kulturi in generiranjem vsakodnevnih kulturnih praks in mitov, in sicer z ozirom na simbolno moč in ekonomske sile. Tako sledi analizi popularnega proizvoda po principu: 1. kako je proizvod prikazan (reprezentiran), 2. katere družbene identitete so z njim povezane, 3. kako je proizveden, 4. kako se troši (konzumira, uporablja) in 5. kateri mehanizmi regulirajo njegovo distribucijo in uporabo.

Na osnovi semiološke in diskurzivne analize predmet obravnava generiranje sodobnih mitov skozi popularno kulturo.

handling with popular culture: 1. What or who determines popular culture; 2. The influence of commercialization and industrialization on popular culture; 3. The ideological role of popular culture.

The course treats the relationship between representation in popular culture and generation of everyday cultural practices and myths, namely in regard to symbolic power and economic forces. In such a manner it follows the analysis of popular product on the principle: 1. How is the product represented; 2. What social identities are related to it; 3. How it is produced; 4. How it is consumed and used; 5. What mechanisms regulate its distribution nad use.

On the grounds of semiological and discursive analysis the course handles the generation of contemporary myths through popular culture.
